

Curriculum Vitæ – Erica E. M. Moodie

June 12, 2019

* Please see final page for a list of acronyms for funding agencies and societies *

A. IDENTIFICATION

Name: Erica Eleanor Margret Moodie

Address: Department of Epidemiology, Biostatistics, and Occupational Health
McGill University
Purvis Hall, Room 38B
1020 Pine Avenue West
Montreal, Quebec H3A 1A2

Telephone: (514) 398-5520

Email: erica.moodie@mcgill.ca

Website: www.ericamoodie.com

Citizenship: Canadian

Languages: English, French

B. EDUCATION

2006 Ph.D. (Biostatistics)

University of Washington, Seattle WA, USA

Ph.D. thesis title: Inference for optimal dynamic treatment regimes.

Outstanding Student Award

Graduate School Merit Fellowship

Merck Graduate Fellowship

NSERC PGS-B, declined

2004 Master of Science (Biostatistics)

University of Washington, Seattle WA, USA

2001 Master of Philosophy (Epidemiology)

Cambridge University, UK

M.Phil. thesis title: Modelling techniques for missing data:

Intensive case-management versus standard case-management for severe psychosis.

Commonwealth Fellowship

NSERC PGS-A, declined

- 2000 Bachelor of Arts (Mathematics and Statistics double-major)
 University of Winnipeg, Winnipeg MB
 Gold Medal in Statistics
 Fessenden-Trott Scholarship
 Women in Engineering and Sciences Fellowship (National Research Council)
 Chancellor's Special Entrance Scholarship
 Isbister Undergraduate Scholarship
 Robert P. Purves Scholarship
 Academic Proficiency Undergraduate Scholarship (1998 and 1999)
 Professor Gunter Weiss Scholarship in Statistics
- 1997 International Baccalaureate Diploma
 Kelvin High School, Winnipeg MB
 Graduated in the top 1% world-wide, scoring 43 out of a possible 45 points
 Governor General's Academic Medal (Bronze: Secondary School level)

C. APPOINTMENTS

- 2012-present Associate Professor, Department of Epidemiology, Biostatistics,
 and Occupational Health, McGill University
- 2012-present Associate Member, Department of Mathematics and Statistics, McGill University
- 2006-2012 Assistant Professor, Department of Epidemiology, Biostatistics,
 and Occupational Health, McGill University
- 2019-2020 Telemachus Scholar, McGill University
- 2019- Member, Mark Wainberg Centre for Viral Diseases

D. SPECIAL HONOURS, AWARDS, RECOGNITION

Career Awards

- 2006-2011 NSERC University Faculty Award \$200,000
 Due to maternity leaves, this award covered the period 2006-2013.
- 2013-2017 FRQS Chercheur-Boursier, Junior 2 \$256,943
- 2017-2021 FRQS Chercheur-Boursier, Senior \$295,451

Recognitions

- 2018 Principal's Prize for Outstanding Emerging Researchers
- 2017, 2019 EBOH Excellence in Mentoring Award
- 2015- William Dawson Scholar, McGill University
- 2015 Elected Member, International Statistical Institute

E. TEACHING

E1. Graduate Courses

Department of Epidemiology and Biostatistics, McGill University

Course title	Course no.	In-class hours	Credits	Year	No. students
Advanced Generalized Linear Models: Correlated Data	BIOS 612	30	4	2007	4
				2009	5
				2010	10
				2013	10
				2015	10
Principles of Inferential Statistics	EPIB 607	39	4	2007	21
				2008	29
				2010	27
				2012	40
Epidemiology Regression Models II	BIOS 602	39	4	2016	10
				2017	11
				2018	9

Elsewhere

Year	Course Title	Location	In-class hours	No. Students
2014	Longitudinal Data Methods	Imperial College London	15	17

E2. Short Courses and Tutorials

Year	Course Title	Location	In-class hours	No. Students
2014	Personalized Medicine: Dynamic Treatment Regimes	U. of Washington	3	9
2014	Statistical Methods for Dynamic Treatment Regimes	Deming Conference	3	50
2015	Marginal Structural Models	Fields Institute	3.5	25
2015	Dynamic Treatment Regimes, Sequentially Randomized Trials, and Causal Inference (co-taught with B. Chakraborty)	JSM	4	16
2015	Statistical Methods for Tailoring Treatment to Patients (co-taught with M. Kosorok & E. Laber)	JSM	1.5	~300
2016	Introduction to Causal Inference: Philosophy, Framework, and Key Methods	Universidade Federal do Rio de Janeiro	6	~20
2016	Introduction to Causal Inference using the Propensity Score (co-taught with D. Stephens)	U. of Toronto	5	~100
2016	Introduction to Causal Inference: Philosophy, Framework, and Key Methods	U. of Calgary	6	~150
2017	Causal Questions and Principled Answers: A Guide Through the Landscape for Practising Statisticians	International Society for Clinical Biostatistics	6	45

	(co-taught with members of the STRATOS Causal Inference Topic Group)			
2018	The Propensity Score as a Tool for Causal Inference (co-taught with David Stephens)	McGill Summer School in Health Statistics	6	35
2018	Causal Questions and Principled Answers: A Guide Through the Landscape for Practising Statisticians (with the STRATOS Causal Inference Topic Group)	Statistical Society of Canada	6	46
2018	An Introduction to Adaptive Treatment Strategies from a Statistical Perspective	Roche Mississauga	4	50
2019	The Propensity Score as a Tool for Causal Inference (co-taught with David Stephens)	McGill Summer School in Health Statistics	6	25
2019	Statistical Approaches to Adaptive Treatment Strategies	McGill Summer School in Health Statistics	6	25
2019	Adaptive Treatment Strategies: An Introduction to Statistical Approaches for Estimation	JSM	4	TBD

E3. Research Trainees Supervised **Indicates that I was the primary or sole supervisor.*

Post-doctoral trainee supervision

2009-2011	*Michael Regier (Co-supervisor: Robert Platt) <i>Current position:</i> Assistant Professor, University of West Virginia
2011-2013	*Olli Saarela (Co-supervisor: David Stephens) Finnish Foundation for Technology Promotion (40,000Euros) <i>Current position:</i> Assistant Professor, University of Toronto
2012-2013	Ashley Naimi (Co-supervisor: Jay Kaufman) FRSQ post-doctoral award (\$30,000/year, two years) SER Lilienfeld Postdoctoral Prize Paper Award <i>Current position:</i> Assistant Professor, University of Pittsburgh
2013-2016	*Michael Wallace (Co-supervisor 2014-2016: David Stephens) Thomas R. Ten Have Award at the Atlantic Causal Inference meeting (2014) CAN-AIM DSEN Fellowship (\$13,000) SSC Biostatistics Section Travel Award (\$250) <i>Current position:</i> Assistant Professor, University of Waterloo
2018-2019	*Juliana Schulz <i>Current position:</i> Assistant Professor, HEC
2019-	*Mamadou Yauck SAMSI-CANSSI Postdoctoral Fellowship (\$65,125 USD)
2019-	*Eric Rose CANSSI-StatLab-CRM Postdoctoral Fellowship (\$45,000)

Graduate students: Doctoral degree supervision

2000-2009	*Sheila McDonald, Ph.D. Epidemiology (Co-supervisor: John Lynch)
-----------	--

- CIHR Doctoral Award; (\$20,000/year, three years)
Current position: Adjunct Assistant Professor, University of Alberta
- 2006-2012 Yongling Xiao, Ph.D. Biostatistics (Co-supervisor: Michal Abrahamowicz)
 Graduate Research Enhancement and Travel Award (\$1000)
Current position: Biostatistician, Analysis Group
- 2006-2013 *Benjamin Rich, Ph.D. Biostatistics (Co-supervisor: David Stephens)
 NSERC CGS-D3 (\$21,000/year, three years)
Current position: Biostatistician, Certara
- 2009-2013 *Mireille Schnitzer, Ph.D. Biostatistics (Co-supervisor: Robert Platt)
 NSERC CGS-D3 (\$35,000/year, three years)
 Canadian Scleroderma Research Group (CSRG) mentorship program (\$3,500)
 SSC Travel Award (\$500)
 SSC Case Studies Award (\$500)
 FRQNT bourse de stage international (\$7,500)
 Graduate Program for International Travel Award (\$950)
 Statistics underpinning Science, Technology and Industry Travel Award (£300)
 Graduate Research Enhancement and Travel Award (\$500)
Current position: Assistant Professor, Université de Montréal
- 2010-2015 *Alex Bliu, Ph.D. Biostatistics (Co-supervisor: James Hanley)
Current position: Biostatistician, Health Canada
- 2011-2015 *Ethan Gough, Ph.D. Epidemiology (Co-supervisor: Ameer Manges, UBC)
 Vanier Canada Graduate Scholarship (\$50,000/year, three years)
 Graduate Research Enhancement and Travel Award (\$1000)
Current position: Postdoctoral Fellow, University of British Columbia
- 2011-2015 Laurence Brunet, Ph.D. Epidemiology (Co-supervisor: Marina Klein)
 FRQS doctoral award (\$20,000/year, three years)
 Young Investigator Award, Canadian Association for HIV Research (\$1000)
 Young Investigator Award, Conference on Retroviruses and Opportunistic Infections
 Graduate Research Enhancement and Travel Award (\$1000)
 Best presentation, Journée des étudiants du réseau sida et maladies
 infectieuses du FRQ-S
Current position: Assistant Director of Epidemiology, EpiVidian
- 2011-2017 *Nabila Parveen, Ph.D. Biostatistics
 McGill University Faculty of Medicine Graduate Scholarship (\$12,000)
Current position: Biostatistician, Health Canada's Biologics and
 Genetic Therapies Directorate
- 2012-2017 Carmine Rossi, Ph.D. Epidemiology (Co-supervisor: Marina Klein)
 CIHR Doctoral Research Award (\$30,000/year, three years)
 FRQS Doctoral Research Award (\$20,000/year, three years), declined
 New Investigator Award, Canadian Association of HIV Research (\$1000)
 Conference on Retroviruses and Opportunistic Infections (CROI), Young
 Investigator Award
 Institute Community Support Travel Award, CIHR
- 2012-(2018) Ryan Kyle, Ph.D. Epidemiology (Co-supervisor: Michal Abrahamowicz)
 McGill University Faculty of Medicine Graduate Scholarship (\$12,000)

- SSC Biostatistics Section Travel Award (\$250)
 Studies interrupted for personal reasons.
- 2012-(2018) *Gillian Ainsworth, Ph.D. Biostatistics (Co-supervisor: Abbas Khalili)
 Graduate Research Enhancement and Travel Award (\$500)
 Changed supervisors in 2018.
- 2013-2018 Taylor McLinden, Ph.D. Epidemiology (Co-supervisor: Joseph Cox)
 McGill University Faculty of Medicine Graduate Scholarship (\$12,000)
 Canadian HIV Observational Cohort (CANOC) Centre Doctoral Scholarship
 (\$21,500)
 McGill MedStar Award (\$500), in recognition of excellence in research
Current position: Epidemiologist, BC Centre for Excellence in HIV/AIDS
- 2015- *Gabrielle Simoneau, Ph.D. Biostatistics (Co-supervisor: Robert Platt)
 FRQNT Doctoral Research Award (\$20,000/year, three years)
 Statistics Society of Canada Travel Award (\$500)
 Statistics Society of Canada Biostatistics Section Travel Award (\$250, twice)
 Graduate Research Enhancement and Travel (GREAT) Award (\$900 in 2018, \$1000 in 2019)
- 2016- *Janie Coulombe, Ph.D. Biostatistics (Co-supervisor: Robert Platt)
 Statistics Society of Canada Case Studies Award (\$500)
 NSERC CGS-D (\$21,000/year, two years)
- 2017- *Daniel Rodriguez Duque, Ph.D. Biostatistics (Co-supervisor: David Stephens)
 NSERC Alexander Graham Bell Scholarship (CGS-D, \$35,000/year, two years)
 FRQNT Doctoral Research Award (\$21,000/year, three years)
- 2017- Gayatri Marathe, Ph.D. Epidemiology (Co-supervisor: Marina Klein)
- 2017- Quoc Nguyen, Ph.D. Epidemiology (Co-supervisor: Christina Wolfson)
 Fondation du CHUM training award, Centre hospitalier de l'U. de Montréal (\$38,451), declined
 FRQS doctoral training award (\$39,323/year, four years)
 CIHR doctoral training award (\$35,000/year, three years)
 Département de médecine complémentaire training award, U. de Montréal (\$25,000)
 Société québécoise de gériatrie training scholarship (\$1000)
- 2017- Estelina Capistrano, Ph.D. in Statistics at Universidade Federal do Rio de
 Janeiro, Brazil (Co-supervisor: Alexandra Schmidt)
- 2018- Shuo (Mila) Sun, Ph.D. Biostatistics (Co-supervisor: Johanna Neslehova)
- 2018- Armando Turchetta, Ph.D. Biostatistics (Co-supervisor: David Stephens)
- 2018- Ivan Marbaniang, Ph.D. Epidemiology (Co-supervisor: Joseph Cox)

Graduate students: Master's degree supervision

- 2007-2009 *Piotr Biernot, M.Sc. Biostatistics
 NSERC CGS-M (\$17,300/year, two years)
 Statistics Society of Canada Travel Award (\$500)
- 2008-2010 Julia Thorpe, M.Sc. Epidemiology (Co-supervisor: Marina Klein)
 National CIHR Research Training Program in Hepatitis C Fellowship (\$17,850)
 Best Clinical Science Presentation, 2010 Annual National CIHR Research
 Training Program in Hepatitis C Meeting (\$500)
 Department of EBOH Research Day, Oral Presentation First Place Honours (\$100)

Young Investigator Award, 17th Annual Conference on Retroviruses and Opportunistic Infections

- 2010-2011 Niamh Higgins, M.Sc. Epidemiology (Co-supervisor: Marina Klein)
CIHR Canadian Observational Cohort (CANOC) Collaboration Trainee Award (\$21,500)
Canadian Medical Protective Association grant (\$32,040)
RRSPQ Prix étudiant 2012, thèse de Maîtrise (\$1,000)
- 2010-2012 Julie Héroux, M.Sc. Biostatistics (Co-supervisor: Erin Strumpf)
Department of EBOH Research Day, Oral Presentation First Place Honours (\$100)
- 2010-2012 *Nassim Mojaverian, M.Sc. Biostatistics
- 2012-2015 *Elizabeth Krakow, M.Sc. Epidemiology
- 2014-2016 *Yuxin Fan, M.Sc. Biostatistics
- 2015-2016 Hao Zhang, M.Sc. Biostatistics (Co-supervisor: David Stephens)
- 2015-2017 *Shouao (Stan) Wang, M.Sc. Biostatistics (Co-supervisor: David Stephens)
- 2016-2017 *Wilhemina Pels, M.Sc. Mathematical Science, African Institute for Mathematical Sciences (AIMS), Senegal
- 2016-2018 Cherry Chu, M.Sc. Epidemiology (Co-supervisor: Eric Latimer)
- 2017-2019 *Ferdous Hossain, M.Sc. Biostatistics
McGill University Faculty of Medicine Graduate Scholarship (\$10,000)
- 2018-2019 Khalida Nasiri, M.Sc. Epidemiology (Co-supervisor: Haim Abenheim)
- 2018- *Larry Dong, M.Sc. Biostatistics
IVADO Excellence Scholarship (\$20,000/year, two years)
- 2018- Dirk Douwes-Shultz, M.Sc. Biostatistics (Co-supervisor: Alexandra Schmidt)

Undergraduate trainee supervision

- 2010 *Mathieu Bray
- 2011 *Julie Novak
- 2012 *Yue Ru Sun
- 2016 *Lara Mayeleff
ISM Undergraduate Summer Research Scholarship, \$3,750
- 2019 *Zhicong Ma
- 2019 *Yang Lu

Thesis committee member

- 2010-2017 Sathya Karunanathan, Ph.D. Epidemiology (Supervisor: Christina Wolfson)
- 2012- Hiroshi Mamiya, Ph.D. Epidemiology (Supervisors: David Buckeridge, Alexandra Schmidt)
McGill University Faculty of Medicine Graduate Scholarship (\$12,000/year, two years)
CIHR Institute Community Support Travel Award
Award for Outstanding Student or Post-Degree Abstract, 2nd prize, International Society for Disease Surveillance
- 2015- Sahar Saeed, Ph.D. Epidemiology (Supervisors: Marina Klein, Erin Strumpf)
CIHR - Frederick Banting and Charles Best Canada Graduate Scholarship Doctoral Award (Ranked Top 3%, \$35,000/year, three years)
Canadian Institute of Health Research Travel Award \$2449

Infectious Diseases and Immunity in Global Health Travel Award \$2449
 FRQS Doctoral Award (ranked 1st in division, \$20,000/year, three years)
 Canadian Hepatitis C Network - Doctoral Award (\$23,000/year, three years)
 Graduate Research Enhancement and Travel (GREAT) Award \$3000
 Best Poster, 2nd Annual Infectious Diseases and Immunity in Global Health
 Research Day (\$200)
 5th Symposium on Hepatitis C, Best Clinical Presentation (\$500)
 Department of EBOH Research Day, Oral Presentation Second Place (\$50)
 Three minute Thesis Video Competition, University without Walls, 2nd Prize (\$500)
 Young Investigator Award, Conference on Retroviruses and Opportunistic Infections,
 Award 2017, 2018 (\$1500 each year)
 2018- Lydia Ould Brahim, Ph.D. Nursing (Co-supervisors: Sylvie Lambert & Nancy
 Feeley)

Other supervision

2016-2017 Celline Brasil, Ph.D. in Medications and Pharmaceutical Assistance
 at Universidade Federal de Minas Gerais, Brazil (visiting student, one year)
 2018-2019 Widemberg Nobre, Ph.D. in Statistics at Universidade Federal do Rio de
 Janeiro, Brazil (visiting student, one year)
 2019 Sebastián Martínez, Ph.D. in Statistics at University of Glasgow, UK
 (visiting student, one month)
 2019 Bianca Granato, Ph.D. in Quantitative Life Sciences, McGill (rotation)

Research Assistant supervision

2012 *Yue Ru Sun
 2013-2014 *Jamie Karran
 2016-2017 *Shomoita Alam

E4. Mentoring activities

Mentorship of new faculty

2015-2019 Denis Talbot, Université Laval
 2016-2018 Paramita Saha-Chaudhuri, McGill University
 2016-2018 Alexandra Schmidt, McGill University

Faculty Mentor: Statistical Society of Canada, Case Studies competition

2016 Two teams, made up of Biostatistics graduate and Statistics undergraduate students
 2017 Two teams, made up of Biostatistics graduate and Statistics undergraduate students
 First prize won by the team made up of J. Coulombe, S. McGrath, & Z. Wang

Mentorship of graduate students through the Huskies@Work

2018-2019 Sabrina Ebengho

2018-2019 Lilian Liu

F. Other Contributions

F1. Journals

Journal Editorships

2009 Guest Editor, *International Journal of Biostatistics*

2009-2013 Associate Editor, *International Journal of Biostatistics*

2011 Guest Editor, *Statistical Communications in Infectious Diseases*

2011-2013 Associate Editor, *Journal of Causal Inference*

2013- Associate Editor, *Biometrics*

2014- Associate Editor, *Journal of the American Statistical Association, Theory & Methods*

Reviewer of Journal Articles

Annals of Statistics, Annals of Operations Research, American Journal of Epidemiology, American Journal of Nephrology, Biometrics, Biometrika, Biostatistics, Canadian Journal of Public Health, The Canadian Journal of Statistics, Clinical Trials, Computer Methods and Programs in Biomedicine, Epidemiologic Methods, Epidemiology, International Journal of Biostatistics, International Journal of Eating Disorders, International Journal of Epidemiology, International Journal of Public Health, Journal of the American Statistical Association, Journal of Clinical Epidemiology, Journal of Multivariate Analysis, Journal of the Royal Statistical Society, Lifetime Data Analysis, Neuroimage, PLoS - Medicine, Statistics in Biosciences, Statistics in Medicine, Statistica Sinica

Reviewer of Book Proposals, Chapters, and Reports

Chapman & Hall, CRC Press, SAS Press, U.S. Department of Education (National Center for Special Education Research), Wiley & Sons.

F2. Grant Reviews

Reviewer for Granting Agencies

2009-2011, NSERC Discovery Grants
2016, 2018

2009 MITACS Networks & Training Initiative

2012 The Netherlands Organisation for Health Research and Development (ZonMw):
Health Technology Assessment Methodology Grants

2012	Israel Science Foundation
2013	French National Research Agency
2013, 2016	Medical Research Council (United Kingdom)
2015	Flanders Research Foundation (FWO, Belgium)
2018	Reviewer, Banff International Research Station
2018	Member, Healthy Brains for Healthy Lives Innovative Ideas Awards

Panel Member of Review Committees

2010, 2013 2018	CIHR Public, Community & Population Health Operating Grants
2011-2013	CIHR Meetings, Planning and Dissemination Grants
2013-2015	NSERC Discovery Grants
2017	CIHR Innovative Biomedical and Clinical HIV/AIDS Research Grants
2018	U.S. Department of Education, Institute of Education Sciences Research Training Programs

F3. Administrative Responsibilities and Committees

Department of Epidemiology, Biostatistics, and Occupational Health

2006-2007	Member, Epidemiology Ph.D. Program Committee
2006-2008	Member, Epidemiology M.Sc. Program Committee
2007-	Member, Biostatistics Programs Committee
2007-	Member, Biostatistics Admissions Committee
2007-2009	Chair, Biostatistics Applied Exam Committee
2008-2010, 2014-	Organizer, Biostatistics Seminar Series
2011-	Director, Biostatistics Graduate Programs
2012-2014	Member, Departmental Tenure Committee
2012-2013	
2015-2017	Member, Recruitment Committee (Biostatistics)
2013	Member, Appointments Committee
2012-	Chair, Biostatistics Theory Exam Committee
2014-2015	
2017-2018	Chair, Recruitment Committee (Biostatistics)
2017-2018	Chair, Recruitment Committee (Joint: Biostatistics, Radiology)
2015-2018	Director, Biostatistics Internship Program

In 2010, I established the Biostatistics Educational Activities Fund to support the activities of our department for the expansion of our students' (bio)statistical education. The funds primarily serve activities such as the Biostatistics seminar series and workshops.

McGill University

- 2010-2012 Member, Faculty of Medicine Postgraduate Awards Committee (PGAC)
- 2013 Member, Recruitment Committee (Obstetrics and Gynecology)
- 2013 Pro-dean (thesis examination) on two occasions
- 2015 Pro-dean (thesis examination) on two occasions
- 2016 Pro-dean (thesis examination) on two occasions
- 2017- Director, McGill Health Statistics Training Network
- 2018- Member, McGill initiative in Computational Medicine subcommittee on Education
- 2018-2020 Member, University Tenure Committee for the Faculty of Medicine
- 2019-2021 Assessor, Harassment & Discrimination Assessment Committee
- 2019 Reviewer, Faculty of Medicine Internal Grant Review Panel
- 2019 Member, Working Group on Salary Equity

National and International

- 2008-2013 Member, Bilingualism Committee, Statistical Society of Canada
- 2009-2014 Member, Elections Committee, Statistical Society of Canada
- 2012 Doctoral Thesis Examiner, University of Ghent, Statistical Data Analysis Program
- 2013-2015 Member, Biostatistics Section Elections Committee, SSC
- 2013-2016 Co-chair, Causal Inference Topic Group for STRengthening Analytical Thinking for Observational Studies, an initiative launched by the International Society for Clinical Biostatistics to improve analyses of observational data
- 2014-2018 Statistics Representative, Scientific Committee of the CRM
- 2014-2017 SSC Representative to the CRM
- 2015 Doctoral Thesis Examiner, Université du Québec à Montréal, Department of Mathematics
- 2015-2019 Associate Director (Quebec) of CANSSI
- 2015-2019 Member, Nominating Committee for the Scientific Advisory Committee of CANSSI
- 2016-2017 Scientific Program Chair, SSC 2017 Annual Meeting
- 2016 Doctoral Thesis Examiner, Université Paris Ouest Nanterre, Mathematics Department
- 2016- Steering Group, Causal Inference Topic Group for STRATOS
- 2018 Doctoral Thesis Examiner, University of Waterloo, Department of Statistics & Actuarial Sciences
- 2018-2019 Chair, Respectful SSC Committee
- 2019 Search Committee for the Regional Director of the CANSSI-Quebec Regional Centre

F4. Professional Associations

- 2004- Royal Statistical Society
- 2005-2007 Western North American Region of the International Biometrics Society

2006-	Statistical Society of Canada
2007-	Eastern North American Region of the International Biometrics Society
2009-	Centre de recherches mathématiques

G. RESEARCH

G1. Research Activities

My primary research interest lies in the intersection of longitudinal data methods and causal inference, with particular focus on dynamic (or adaptive) treatment regimes. My research programme currently focuses on three topics in biostatistics: dynamic treatment regimes, “imperfect” data in longitudinal studies (missingness, measurement error), and statistical methods for HIV research. Within the substantive area of HIV, I am involved in the investigation of various aspects of treatment and lifestyle exposures in HIV-positive populations, including men who have sex with men in Montreal and Canadians who are co-infected with the Hepatitis C virus.

I am a member of both the Liver Working Group and the Mental Health Working Group of the North American AIDS Cohort Collaboration on Research and Design (NA-ACCORD).

G2. Grants Obtained

*As Principal Investigator: Title, total (years). *Indicates sole investigator/applicant.*

1. FRQNT Programme Samuel de Champlain de développement de partenariats stratégiques en matière d’enseignement et de recherche – Modélisation du recrutement dans le cadre d’essais séquentiels pour des algorithmes de traitement des soins adaptatifs des maladies chroniques: une étude statistique, \$18,300 (+ 12,750Euros to French co-I St-Pierre) (2019-2021).
2. *NSERC Discovery Grant – Causal inference in network settings, \$230,000 (2019–2024).
3. Unité Mixte Internationale French Research Exchange – 2500Euros (2019-2020).
4. NIMH R01 – Improved tailoring of depression care using customized clinical decision support. \$1,511,994USD (2018-2022) Co-PI: Susan Shortreed (Kaiser Permanente Washington Research Institute), co-investigators: Gregory Simon (Kaiser Permanente)
5. CANSSI Workshop Grant – Causal inference in the presence of dependence and network structure: modelling strategies and model selection, \$12,000 (2018). Co-organizers: Alexandra Schmidt, David Stephens
6. PIMS Workshop Grant – Causal inference in the presence of dependence and network structure: modelling strategies and model selection, \$4,500 (2018). Co-organizers: Alexandra Schmidt, David Stephens
7. Healthy Brains for Healthy Lives Innovative Ideas Award – A personalized approach to depression care: Discovering adaptive treatment strategies, \$131,695 (2018-2020). Co-investigators: Samy Suissa (McGill), Christel Renoux (Lady Davis Research Institute).

8. CANSSI Workshop Grant – Risk modeling, management and mitigation in health sciences, \$8,000 (2017). Co-organizers: Daniel Graham (Imperial College London), Nicholas Jewell (University of California, Berkeley) and David Stephens (McGill).
9. CANSSI Distinguished Visitor Program Grant. \$3,050 (2017). Co-organizers: Gabrielle Simoneau, Marie-Pier Côté.
10. CIHR Catalyst Grant (SPOR Innovative Clinical Trials) – Adaptive internet-based stress management: A pilot sequential multiple assignment randomized trial (SMART) design. Co-PI: Sylvia Lambert (McGill), \$99,998 (2017–2018)
11. CIHR Operating Grant – Personalized medicine using registry cohort data: Developing an adaptive treatment strategy to prevent and treat graft-versus-host disease, \$54,000 (2017–2018). Co-investigators: David Stephens (McGill), Elizabeth Krakow (Fred Hutchinson Cancer Research Center).
12. CANSSI Health Science Collaborating Centre seed grant – McGill Health Statistics Training Network. \$10,000 (2017).
13. CANSSI Distinguished Visitor Program Grant. \$3,000 (2016). Co-organizers: Kevin McGregor, Gabrielle Simoneau.
14. Pacific Institute for the Mathematical Sciences (PIMS) Workshop Grant – Statistical causal inference and its applications to genetics, \$2,000 (2016). Co-organizers: Robin Evans (University of Oxford), Chris Holmes (University of Oxford), Marloes Maathuis (ETH Zürich), Ilya Shpitser (University of Southampton), David Stephens (McGill University) and Caroline Uhler (IST Austria).
15. CANSSI Workshop Grant – Statistical causal inference and its applications to genetics, \$25,000 (2016). Co-organizers: Robin Evans (University of Oxford), Chris Holmes (University of Oxford), Marloes Maathuis (ETH Zürich), Ilya Shpitser (University of Southampton), David Stephens (McGill University) and Caroline Uhler (IST Austria).
16. *NSERC Discovery Grant – A new framework for estimation and inference of optimal dynamic treatment regimes, \$140,000 (2014–2019).
17. CIHR Operating Grant – Assessing time-varying drug exposures in the Canadian Co-infection Cohort: Methodological tools to address missing data and measurement error, \$263,949 (2013–2017). Co-investigators (McGill University): David Stephens, Marina Klein, James Hanley.
18. Quebec Population Health Research Network Book-writing Grant – Dynamic treatment regimes for personalized medicine, \$5,000 (2011). Co-investigator: Bibhas Chakraborty (Columbia University).
19. CIHR Meetings, Planning and Dissemination Grants – Causal inference in health research, \$10,410 (2011). Co-organizers (McGill University): Jay Kaufman, Robert Platt.
20. *MITACS Networks and Training Program – Causal inference in health research, \$15,000 (2011).
21. *NSERC Discovery Grant – Optimal adaptive treatment strategies: Finding practical solutions to inferential challenges, \$80,000 (2009–2014).
22. CIHR Operating Grant – Statistical methods for causal inference in longitudinal studies with non-compliance and missing data, \$285,177 (2008–2011). Co-investigators (McGill University): Michael Kramer, Robert Platt, Samy Suissa.

23. *NSERC Discovery Grant – Optimal dynamic treatment regimes: Extending the framework, \$36,000 (2006–2009).

24. McGill University Start-up Grant, \$50,000 (2006).

As Co-Investigator or Named Expert: Title, PI, total (years)

25. MEDTEQ Ministère de l'Économie et de l'Innovation (MÉI) – Un système de santé apprenant pour la gestion de la douleur chronique : Une plateforme numérique avec une perspective de réseau. PI: Sara Ahmed and Regina Visca \$589,306 (2019–?)

26. Heart and Stroke Foundation – Anticoagulants oraux et prévention de la démence chez les patients atteints de fibrillation auriculaire : étude de cohorte en population générale. PI: Christel Renoux. \$151,870 (2019–2021)

27. CIHR Project Grant – Antiretroviral-based HIV prevention and its impact on sexual risk behaviours and HIV/STIs among gay, bisexual and other men who have sex with men: Engage Cohort Study. PI: Joseph Cox et al., \$2,673,676 (2019–2023)

28. FRQNT Team Grant – Méthodes d'inférence causale et la prise de décision dans un cadre bayésien. PI: David Stephens, \$205,740 (2018–2021)

29. CIHR Catalyst Grant (SPOR Innovative Clinical Trials) – An adaptive dyadic self-directed coping and self-management skills training intervention for caregivers of individuals with cancer: A pilot sequential multiple assignment randomized trial (SMART) design. PI: Sylvia Lambert, \$99,969 (2017–2018)

30. CIHR Catalyst Grant – Biostatistical methods for estimating the cumulative impact of environmental contaminant exposures on preterm birth. PI: Lawrence McCandless, \$198,330 (2017–2019)

31. CIHR Project Grant – New statistical methods for cohort studies of adverse effects of medications. PI: Michal Abrahamowicz, \$753,035 (2016–2021)

32. SAMSI Workshop Grant – Statistical causal inference and its applications to genetics. PI: Robin Evans (University of Oxford), \$6,500USD (2016)

33. CIHR Foundation Scheme – Tracking a revolution: Evaluating the impact of modern HCV therapy on HIV-HCV coinfection. PI: Marina Klein, \$4,835,202 (2015–2022)

34. CIHR Foundation Scheme – Statistical methods in pharmacoepidemiology and perinatal epidemiology. PI: Robert Platt, \$1,071,721 (2015–2022)

35. CIHR Planning and Dissemination Grant – Prenatal exposure to environmental contaminants and fetal growth: How to account for multiplicity when testing multiple statistical hypotheses? PI: Lawrence McCandless, \$12,500 (2015–2016)

36. CIHR Team Grant – Canadian network for advanced interdisciplinary methods for prospective studies of drug safety and effectiveness. PI: Michal Abrahamowicz, \$1,250,000 (2014–2019)

37. CIHR Operating Grant – Understanding blood pressure and end organ damage in adolescents. PI: Michael Zupitelli, \$438,115 (2014–2018)

38. CIHR Bridge Grant – The coming revolution in HCV therapy: Will HIV-HCV co-infected patients really benefit? PI: Marina Klein, \$100,000 (2014–2015).

39. CIHR Bridge Grant – Phylogenetic-based prevention interventions to curb the Montreal Men-Having-Sex with Men (MSM) epidemic, PI: Bluma Brenner, \$100,000 (2014–2015).

40. CIHR Operating Grant – Propensity scores and marginal structural models in drug safety research, PI: Robert Platt, \$405,940 (2012–2015).
41. CIHR Operating Grant – Prospective investigation of the relationship between food insecurity and health and behavioural outcomes in HIV-HCV co-infection: Clues for prevention interventions, PI: Joseph Cox, \$385,413 (2011–2014).
42. CIHR Operating Grant – Development of strategies to curb the Quebec HIV epidemic based on molecular epidemiological surveillance, PI: Bluma Brenner, \$311,718 (2011–2014).
43. CIHR Operating Grant – Stemming the epidemic of liver related morbidity and mortality in HIV-HCV co-infection: Is ART enough? PI: Marina Klein, \$1,924,155 (2010–2015).
44. FRQNT Team Grant – Méthodes statistiques pour les études multiniveaux, PI: Nandini Dendukuri, \$145,800 (2008–2011).
45. NIH Operating Grant – Soy-rich diet for preventing chronic post breast cancer surgery pain, PI: Yoram Shir, \$236,446.32 (2008–2010).

As Collaborator: Title, PI, total (years)

46. MRC Methodology Research Programme Grant – Comparative Effectiveness Research using Observational data: methodological developments and a roadmap (CER-OBS), PI: Bianca de Stavola

G3f. Conference Presentations

Conference presentations (invited) -

1. SAMSI Precision Medicine Transition Workshop, Durham North Carolina (May, 2019) Sequential decision making with observational data.
2. McGill initiative on Computational Medicine Symposium, Montreal, QC (November, 2018) Statistical perspectives on precision medicine: Tailoring immunosuppressant therapy to transplant patients. Keynote address.
3. JSM, Vancouver, BC (August, 2018) Shared-parameter G-estimation of optimal treatments for rheumatoid arthritis.
4. SSC Annual Meeting, Montreal, QC (June, 2018) Shared-parameter G-estimation of optimal treatments for rheumatoid arthritis.
5. ENAR/IBS Meeting, Atlanta, GA (March, 2018) Shared-parameter G-estimation of optimal treatments for rheumatoid arthritis.
6. Atelier de maillage, Montreal, QC (March 2018) CANSSI: The role of statisticians in data science.
7. Statistics and Health Conference, Toulouse Institute of Mathematics and the International Centre for Mathematics and Computer Science in Toulouse, France (January, 2018). An introduction to SMART designs. Keynote address.
8. Canadian Network for Observational Drug Effect Studies (CNODES) Semi-Annual Research Meeting, Montreal, QC (October, 2017) Dynamic treatment regimes: Statistical perspectives on a personal approach to medical decision-making.
9. Innovative Statistics and Machine Learning for Precision Medicine, Institute for Mathematics and its Applications, Minneapolis, MN (September, 2017) Doubly-robust estimation of shared-parameter adaptive treatment strategies.
10. International Society for Clinical Biostatistics (ISCB), Vigo, Spain (July, 2017) Personalizing immunosuppressant regimes following transplantation.
11. Blood and Marrow Transplantation (BMT) Tandem Meetings, Orlando, FL (February, 2017) An introduction to adaptive treatment strategies.
12. Joint Statistical Meetings (JSM), Chicago, IL (August, 2016) The vexing problem of analyzing real data: Discussion of ‘Personalized dose finding using outcome weighted learning’.
13. Joint Statistical Meetings (JSM), Chicago, IL (August, 2016) Model validation and selection in estimation of dynamic treatment regimes.
14. International Biometrics Conference, Victoria, BC (July, 2016) Modeling marginal hazard in the presence of unobserved histories: Does interrupting ART increase the risk of liver fibrosis?

15. Eastern North American Region of the International Biometric Society (ENAR/IBS) Meeting, Austin, TX (March, 2016) Model validation and selection in estimation of dynamic treatment regimes.
16. World Statistics Congress, Rio de Janeiro, Brazil (July, 2015) A cure-rate model for estimating the optimal dynamic treatment sequence following bone marrow transplantation.
17. Eastern North American Region of the International Biometric Society (ENAR/IBS) Meeting, Miami, FL (March, 2015) From idealized to realized: Estimating dynamic treatment regimens from electronic medical records.
18. United Kingdom Causal Inference Meeting, Bristol, UK (April, 2015) Correcting measurement error in HIV phylogenetic cluster size.
19. Science Atlantic Mathematics, Statistics and Computer Science Conference, St. John, NB (October, 2014) Dynamic treatment regimens: Quantitative tools for the personalization of medicine. Keynote Speaker: Field Lecture.
20. United Kingdom Causal Inference Meeting, Cambridge, UK (April, 2014) Addressing measurement error in the confounders in inverse probability weighting.
21. The American Statistical Association (ASA) Significance Media Luncheon, Montreal, QC (August, 2013) Hey baby, what's your sign? Why being a Sagittarius is no fun at all. Keynote address.
22. Joint Statistical Meetings (JSM), Montreal, QC (August, 2013) Q-learning with a useful utility.
23. Conference for the Society for Clinical Trials, Boston, MA (May, 2013) Generating candidate optimal individualized dosing strategies.
24. University of Pennsylvania 6th Annual Conference on Statistical Issues in Clinical Trials, Philadelphia, PA (April, 2013) Generating candidate optimal individualized dosing strategies.
25. Eastern North American Region of the International Biometric Society (ENAR/IBS) Meeting, Orlando, FL (March, 2013) Generating candidate optimal individualized dosing strategies.
26. The Bill & Melinda Gates Foundation, Seattle, WA (January, 2013) Marginal Structural Models and Mediation Analyses. Keynote address at FHI360 and USAID collaborative meeting on "Best practices in analytic approaches to assess the effect of hormonal contraception on HIV acquisition with observational data".
27. SSC, Guelph, ON (June, 2012) Q-learning for Estimating Optimal Dynamic Treatment Rules from Observational Data.
28. Time for Causality - Causal Inference and Dynamic Decisions in Longitudinal Studies Workshop, Bristol, UK (April, 2012) Q-learning for Estimating Optimal Dynamic Treatment Rules from Observational Data.
29. Foundations and Frontiers: A Conference Celebrating the Contributions of Mary Thompson to the Statistical Sciences, Waterloo, ON (October, 2011) Q-learning for Estimating Optimal Dynamic Treatment Rules from Observational Data.
30. Eastern North American Region of the International Biometric Society (ENAR/IBS) Meeting, New Orleans, LA (March, 2010) Model-checking for Semiparametric Estimation of Optimal Dynamic Treatment Regimes.

31. Joint Statistical Meetings (JSM), Washington D.C. (August, 2009) Structural Nested Mean Modeling of Response-maximized Breastfeeding Strategies.
32. Atlantic Causal Modeling Conference, Philadelphia, PA (May, 2009) Invited discussants of Structural Nested Mean Models for Assessing Time-Varying Effect Moderation by Daniel Almirall, Thomas Ten Have, and Susan A. Murphy.
33. Western North American Region of the International Biometric Society (WNAR/IBS) Meeting, Davis, CA (June, 2008) Quantifying Dose-Response for a Continuous Treatment in the Presence of Non-Compliance or Confounding.
34. Statistical and Applied Mathematical Sciences Institute (SAMSI) summer programme on Dynamic Treatment Regimes and Multistage Decision-Making, Durham, NC (June, 2007) Asymptotic Bias Correction for g-estimation of Optimal Dynamic Regimes.
35. Statistical Society of Canada (SSC) meeting; St. John's, NL (June, 2007) Quantifying Dose-Response for a Continuous Treatment in the Presence of Non-Compliance or Confounding.
36. Western North American Region of the International Biometric Society (WNAR/IBS) Meeting; Flagstaff, AZ (June, 2006) Bias Correction in Non-differentiable Estimating Equations for Optimal Dynamic Regimes.

Presentations at universities or research institutes (invited) -

1. McGill University, Quantitative Life Sciences Seminar Series (December, 2018) SMART studies: An evidence-based approach to precision medicine
2. McGill University, Cutting Edge Lectures in Science (December, 2018) Did this make that happen? What statisticians have to say about causality.
3. Université de Québec à Montréal, Séminaire Statistique (December, 2018) Statistical approaches to precision medicine: An overview.
4. Ipsen – Cambridge, MA location (December, 2018) SMART studies: An evidence-based approach to precision medicine
5. University of Winnipeg, Department of Mathematics and Statistics (September, 2018) An introduction to causal inference in statistics.
6. Université de Montréal, Faculté de pharmacie (December, 2017) Adaptive treatment strategies: An introduction from a statistical perspective.
7. Johns Hopkins University, Bloomberg School of Public Health, Department of Biostatistics (October, 2017) G-estimation: Is it all you need?
8. McGill University, Department of Epidemiology, Biostatistics, & Occupational Health – Biostatistics seminar series. (October, 2015) How SMART is your trial? Obtaining quality data about dynamic treatment regimes.
9. Dartmouth University, Department of Biostatistics and Epidemiology (May, 2015) SMART studies and the personalization of medical care.
10. University of Glasgow, Department of Statistics (May, 2014) SMART studies and the personalization of medical care.

11. Oxford University, Department of Statistics (April, 2014) SMART studies and the personalization of medical care.
12. London School of Hygiene and Tropical Health, Centre for Statistical Methodology (April, 2014) SMART studies and the personalization of medical care.
13. University of Manchester, Centre for Biostatistics, Institute of Population Health (March, 2014) How SMART is your study? Obtaining quality data to estimate dynamic treatment regimes.
14. Cambridge University, Medical Research Council Biostatistics Unit (March, 2014) How SMART is your study? Obtaining quality data to estimate dynamic treatment regimes.
15. Oxford University, Centre for Statistics in Medicine (January, 2014) How SMART is your study? Obtaining quality data to estimate dynamic treatment regimes.
16. Université de Sherbrooke, Department of Mathematics (April, 2013) The current state of Q-learning for personalized medicine.
17. McGill University, Department of Mathematics & Statistics. (September, 2012) The current state of Q-learning for personalized medicine.
18. Ghent University, Center for Statistics. (July, 2012) Learning of optimal dynamic treatment rules from observational data.
19. McGill University, Department of Epidemiology, Biostatistics, & Occupational Health – Epidemiology seminar series. (March, 2012) Learning about optimal personalized treatment rules from observational data.
20. Harvard School of Public Health (September, 2010) Marginal structural models for competing risks.
21. London School of Hygiene and Tropical Medicine, Medical Statistics Unit (August, 2009) Structural nested modeling of optimal breastfeeding strategies.
22. MUHC Department of Clinical Epidemiology (March, 2009) Estimating unbiased dose-response curves from repeated measures in the presence of confounding.
23. University of Toronto, Dalla Lana School of Public Health – Biostatistics (March, 2009) Estimating unbiased dose-response curves from repeated measures in the presence of confounding.
24. Laval University, Department of Statistics (March, 2008) The multivariate generalized propensity score: Estimating dose-response functions from longitudinal data.
25. University of Washington, Department of Biostatistics and Department of Statistics [special joint seminar] (January, 2008) The multivariate generalized propensity score: Estimating dose-response functions from longitudinal data.
26. University of Texas MD Anderson Cancer Center, Department of Biostatistics. (September, 2007) Optimal adaptive treatment strategies: Using structural nested models to estimate the optimal duration of breastfeeding.
27. McGill University, Department of Epidemiology, Biostatistics, and Occupational Health - Biostatistics seminar series. (September, 2007) Optimal adaptive treatment strategies: Using structural nested models to estimate the optimal duration of breastfeeding.
28. University of Winnipeg, Department of Mathematics and Statistics. (April, 2007) Optimal adaptive treatment regimes: unbiased estimation for endogenous variables.

29. McGill University, Department of Epidemiology, Biostatistics, and Occupational Health - Biostatistics seminar series. (October, 2006) Bias correction in non-differentiable estimating equations for optimal dynamic regimes.
30. Colloque du Centre de Recherches Mathématiques. (October, 2006) Introduction to optimal dynamic treatment regimes.

Conference presentations (contributed) -

1. Joint Statistical Meetings (JSM), Seattle, WA (August, 2015) Estimating the optimal treatment sequence for graft-versus-host-disease following bone marrow transplantation. *Note:* This was a “topics contributed” session.
2. Eastern North American Region of the International Biometric Society (ENAR/IBS) Meeting; Washington, DC (April, 2012) Q-learning for Estimating Optimal Dynamic Treatment Rules from Observational Data.
3. Statistical Society of Canada (SSC) meeting; Wolfville, NS (June, 2011) Estimation of optimal dynamic treatment rules with shared parameters and non-regularity
4. Joint Statistical Meetings (JSM), Vancouver, B.C. (August, 2010) G-estimation of structural nested model parameters for optimal dynamic treatment regimes: Looking for problems. *Note:* This was a “topics contributed” session.
5. Statistical Society of Canada (SSC) meeting; Quebec, QC (May, 2010) Quantifying dose-response for a continuous treatment in the presence of non-compliance or confounding.
6. Statistical Society of Canada/Société Francovcaise de Statistique meeting: Ottawa, ON (May, 2008) Bias reduction for g-estimation of optimal dynamic regimes at exceptional laws.
7. Western North American Region of the International Biometric Society (WNAR/IBS) Meeting; Fairbanks, AK (June, 2005) A new calculation for recursive g-estimation of optimal dynamic treatment regimes.
8. Royal Statistical Society (RSS) Meeting; Manchester, UK (September, 2004) Dynamic Treatment Regimes: Review and an Application.

Poster presentations (invited and/or peer-reviewed) -

1. Moodie E. E. M. (2007) Causal inference techniques for longitudinal data. CIHR Institute of Infection and Immunity New Investigator Forum; King City, ON.
2. Moodie E. E. M., Saeed S., Klein M. B. (2010) Extending marginal structural models for competing risks: The effect of ART interruptions on death. International Workshop on HIV Observational Databases; Barcelona, Spain.
3. Thorpe J., Saeed S., Moodie E. E. M., Klein M. B. (2010) Interruption of antiretroviral therapy is associated with progression of liver fibrosis in HIV/HCV co-infected adults. International Workshop on HIV Observational Databases; Barcelona, Spain.

Workshops, working groups, and other activities -

1. As a Program Leader, co-organizing a year-long programme on *Precision Medicine* at the Statistical and Applied Mathematical Sciences Institute, August 1, 2018-May 31, 2019. Involvement includes co-chairing a working group with regular (approximately weekly) online meetings and planning of the Opening Workshop, held August 13-17, 2018.
2. Co-organized a four-week short programme entitled *Causal inference in the presence of dependence and network structure: modelling strategies and model selection* at the CRM, June 11-July 6, 2018. The CRM contributed \$52,000 towards the meeting. Financial support was also provided by CANSSI (\$12,000) and PIMS (\$4,500).
3. Co-organized a three-day workshop entitled *Risk Modeling, Management and Mitigation in Health Sciences* at the Centre de Recherches Mathématiques (CRM), December 12-13, 2017. The CRM contributed \$15,000 towards the meeting. CANSSI also provided financial support.
4. Co-organized a four-week short programme entitled *Statistical Causal Inference and its Applications to Genetics* at the CRM, July 25-August 19, 2016. The CRM contributed \$25,000 towards the meeting. Financial support was also obtained from CANSSI and PIMS.
5. Co-organized a five-day workshop entitled *Developing a Comprehensive, Integrated Framework for Advanced Statistical Analyses of Observational Studies* at the Banff International Research Station (BIRS), July 3-8, 2016.
6. Led a working group on “Connecting to Health and Social Sciences” and gave a scientific presentation on “Statistical Causal Inference and its Applications to Genetics” at the Canadian Statistical Sciences Institute (CANSSI) workshop and retreat at the Banff International Research Station (BIRS), September 25-27, 2015.
7. Organized a one-day workshop on R programming led by Dr. Duncan Murdoch (University of Western Ontario) with sponsorship from the Statistics Laboratory of the CRM, which was held in Montreal, QC June 9, 2014.
8. Organized a five-day workshop entitled *Causal Inference in Health Research* as part of the themed semester in statistics sponsored by the Statistics Laboratory of the CRM, which was held in Montreal, QC May 9-13, 2011. The CRM contributed \$25,000 towards the meeting.
9. Organized a two-day workshop entitled *Statistical Methods in HIV Research* as part of the themed semester in statistics sponsored by the Statistics Laboratory of the CRM, Montreal, QC, April 14-15, 2011. The CRM contributed \$15,000 towards the meeting.
10. Organized and chaired an Invited Session (sponsored by WNAR) at the Joint Statistical Meeting in Vancouver, BC, July 31-August 6, 2010.
11. Chaired a contributed session on “Biostatistics” at the Statistical Society of Canada (SSC) Meeting; Quebec, QC, May 22-26, 2010.
12. Organized a five-day workshop along with David Stephens (Mathematics and Statistics, McGill) entitled *Causal Inference in Statistics and the Quantitative Sciences* at BIRS, May 3-8, 2009.
13. Invited presentation on Early Career and Renewal in an Academic Position at the Ontario/Quebec regional Young Investigators meeting of the Statistical Society of Canada, a meeting co-sponsored by the CRM in Montreal, QC, April 4, 2009.

14. Organized and chaired an Invited Session at the XXIV International Biometric Conference in Dublin, Ireland, July 13-18, 2008. The proposal was one of 20 selected from among 77 submissions.
15. Led a working group on “Practical Challenges and Applications” in the SAMSI summer programme on Dynamic Treatment Regimes and Multistage Decision-Making; Durham, NC. June 25-27, 2007.

G3g. Software

DTRreg: Dynamic treatment regime estimation & inference via G-estimation, dynamic WOLS, and Q-learning; implemented in R.

H. DELAYS AND INTERRUPTIONS

2009-2010 Maternity leave: April 10, 2009 to March 26, 2010.

2010-2011 Maternity leave: December 12, 2010 to December 12, 2011.

ACRONYMS

CAN-AIM	Canadian Network for Advanced Interdisciplinary Methods
CANSSI	Canadian Statistical Sciences Institute
CIHR	Canadian Institutes of Health Research
CRM	Centre de recherches mathématiques
DSEN	Drug Safety and Effectiveness Network
ENAR	Eastern North American Region of the IBS
FRQNT	Fonds de recherche du Québec - Nature et technologie
FRQS	Fonds de recherche du Québec - Santé
IBS	International Biometrics Society
ISM	Institut des sciences mathématiques
IVADO	Institut de valorisation des données
JSM	Joint Statistical Meetings
MITACS	Mathematics of Information Technology and Complex Systems
NIMH	(U.S.)National Institute of Mental Health
NSERC	Natural Sciences and Engineering Research Council
RRSPQ	Réseau de recherche en santé des populations du Québec
SER	Society for Epidemiologic Research
SPOR	Strategy for Patient-Oriented Research
SSC	Statistical Society of Canada
STRATOS	STRengthening Analytical Thinking for Observational Studies
WNAR	Western North American Region of the IBS
